

Tool Karabiner K02xx

Product Description

The K02 is a range of mini-offset oval accessory karabiners NOT FOR PPE. They are small enough to be used in a cambium saver retrieval system and at 6kN, mighty enough to be used in a whole range of tool tethering applications and look perfectly at home on any arborist or rope access harness.

Even though they are not for PPE we still laser mark them with individual serial numbers – which should keep your LOLER inspector happy!
