

# Rescue Descender RD2

## Product Description

The RD2 is a self-braking descender designed for experienced users in rescue and rope access. Tested to EN12841:2013 it has a WLL of 140kg and for rescue purposes a WLL of 200kg.

It incorporates a high-efficiency (one-way) pulley wheel with an 88% efficiency on a 1:1 haul. The integrated becket allows the user to set up mechanical advantage systems directly off the device.

## Product Information

Weight 790g

Rope 11mm

Overall Dimensions 160mm x 140mm x 60mm
